Agrospectra-online crop prediction system using soil analysis

Key Skills: Python   CNN

Project Link: https://github.com/Gayatrigawal/online-crop-prediction-system

An online crop prediction system utilizing soil analysis through soil imagery leverages Python's robust libraries for image processing and machine learning. This system analyzes images of soil to extract key features such as texture, color, and composition. Advanced

techniques like convolutional neural networks (CNNs) are employed to interpret these features, predicting the most suitable crops for the given soil conditions.
